Project Manager: Darlene Hackworth  
Program Manager: Joseph Freeland  
Architect: Ashley McGraw Associates  
Project Size: 82,000 SF  
Location: Geneva, NY

**Project Description:**
The Agricultural Sciences Research Lab (ASRL) is an 82,000 gross square foot facility constructed in 1960. The building systems - including electrical, mechanical, fire alarm, and interior finishes are deteriorated and in need of replacement. Additionally, the existing building systems do not meet current program needs and many aspects of the building do not meet current building code requirements. Renovations of the ASRL building will meet the programmatic requirements of the Department of Food Science and Technology; Microbiology, Chemistry, Vinification and Brewing, and Food Engineering, as well as other programs outside of the Food Science and Technology Department such as Tree Fruit Genomics, various extension/outreach programs, administrative functions, address code compliance issues, and seek LEED Silver certification.

**Project Status:**
Bid documents are complete and the final pre-bid estimate has been received. The project estimate is within budget. The project is on hold until construction funding becomes available.

**Approvals to Date:**
- Concept Design: Apr 06, B&P Aug 06
- Design Authorization: Sep 08, B&P Sep 08
- Approve Design: Aug 09, B&P Sep 09

**Project Milestones:**
- Scheduled Construction Start: TBD
- Scheduled Construction Complete: TBD
